

Voice

Default Voice - Callie

Install & Configure

From the FS build directory:

```
make sounds-install
```

The default voice for FreeSWITCH is Callie made by [GM Voices](#).

Voice - Sibylle

Sibylle is a Creative Commons licensed voice for FreeSwitch.

Install & Configure

There are two parts to making this work in FreeSwitch:

- `mod_say_fr` must be updated with the patch found in <http://jira.freeswitch.org/browse/FSCORE-528>
- You must download the sound files appropriate for your network (most people will want the 8000 Hz files) from <http://www.archive.org/details/FrenchAudioFilesForFreeswitch>

The files were created by Sibylle Luperce & Philippe Leroy for Neuronnexion.coop, who put them under a Creative Commons license.

For additional recordings please contact Philippe Leroy.
