

Docs Team 2014.05.06

A brief weekly conference call Tuesday as work continues apace with only 2 active contributors copying and editing the wiki information. If you have a knack for technical writing please join the team to speed up this process. Create an account if you don't already have one and contact the Docs Team on IRC channel #freeswitch to find a section that is not already being handled.

[Mario G](#) has posted extensive installation instructions for Mac distributions and has also made a start on the massive Interoperability documentation tree. [John Boteler](#) is working through the Modules documentation tree.

Accounts

User accounts on JIRA had been used to access other portions of freeswitch.org but are being merged into Crowd for access to Confluence, Stash, and others for single sign on.
