

sip_jitter_buffer_plc

sip_jitter_buffer_plc

BOOLEAN Enables/disables packet loss concealment (PLC) when using the jitter buffer. PLC is enabled by default when the jitter buffer is enabled. Set this variable before enabling the jitter buffer for it to have an effect.

Usage

```
<action application="set" data="sip_jitter_buffer_plc=true"/>
```

```
<action application="set" data="sip_jitter_buffer_plc=false"/>
```
