**park_timeout**

park_timeout

| STRING | When set, a parked call will disconnect after the timeout has occurred. Timeout is specified in seconds. If no park_timeout value is set then the parked call will be held indefinitely or until it is removed with a uuid_transfer. |

**Usage**

```xml
<action application="set" data="park_timeout=30"/>
<action application="park"/>
```

You can also specify which hangup_cause you need when the channel is disconnected by park_timeout.

```xml
<action application="set" data="park_timeout=30:MEDIA_TIMEOUT"/>
```
