Developers

About

Information for developers who wish to create custom applications based on FreeSWITCH or contribute improvements and bug fixes back to the FS community. See also: Contributing Code.

Github Repository

For Committers

First, create a Github account

Next, create a fork of github.com/signalwire/freeswitch in Github

Finally, clone the repo:

**HTTPS**

```bash
$ git clone https://github.com/${YOUR_USERNAME}/freeswitch.git
```

YOUR_USERNAME is your Github user name. Git will prompt your for you password when required.

**SSH**

```bash
$ git clone ssh://git@github.com:${YOUR_USERNAME}/freeswitch.git
```

Example ssh_config for those who need it. (Most people do not need this)

<table>
<thead>
<tr>
<th>Example ssh_config</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>host github.*</code></td>
</tr>
<tr>
<td><code>   IdentityFile ~/.ssh/my_pubkey_file</code></td>
</tr>
</tbody>
</table>

For Non-Committers

Execute the following command to clone the repository:

```bash
$ git clone https://github.com/signalwire/freeswitch.git
```
